

Instructions: Draw a prospecting event card. From the top of the card, choose one of the listing opportunities. Roll a DR10, even numbers only for a market listing, odd or even for an aggressively priced listing, the player must choose before rolling. If the DR10 is no greater than the maximum indicated on the card, a new listing results at the selected price level.

- Key If the indicated OC is available in the listing broker's farmed location or sphere marketing box, do the following (in any case, results are void if the indicated OCs are unavailable) :
- XT: If sphere marketing, roll successful listings on exurban listing location table; otherwise on farmed location card.
- U/S: If sphere marketing, roll successful listings on urban/suburban listing location table; otherwise on farmed location card.
- HE: Roll even or odd for a high-end listing: If sphere marketing, upon a successful listing, roll DR10 x3, sum results, subtract from 100, and match on U/S table. If geographic marketing a location with the "trophy" amenity symbol, a successful listing is automatically placed on the same card. Aggressive pricing applies to any resulting listing.
